

## 10. Profit and Loss (Homework)-

1. Disha bought an antique piece from a shop but she sold it a few days later online at a profit of 15% and also charged a delivery fee of Rs. 71. The man who bought it from her sold it back to the shop Disha had bought it from at a loss of 5%. If that man sold it at Rs. 1444 to the store, then what is the difference between the initial selling price and the final cost price during this transaction?  
 (1)Rs. 200 (2)Rs. 184 (3)Rs. 226 (4)Rs. 185 (5)Rs. 198

**Answers (10. Profit and Loss Home work)**

|    |   |    |   |    |   |    |   |     |   |
